Website audit & implementation brief

Prepared for the development team. Consolidates all feedback and decisions collected in this audit conversation.

The objective is to make the Marketing and Digital offers easier to understand, compare and purchase, while correcting image framing, duplicated navigation and inconsistent layouts.

How to use this report

• **Confirmed requirement:** requested or accepted by the client during the review.

• **Recommendation:** identified during screenshot review; confirm commercial details before implementation.

• **P1:** purchase flow or legal/contract concern. **P2:** navigation, content or visual issue. Priorities are proposed for development planning.

Scope and evidence

Evidence consists of client-supplied screenshots and client-reported click behavior. No live-site interaction, source-code review, payment test, performance measurement or accessibility audit was performed. Items described as missing are absent from the supplied view; verify the actual page and component before changing it.

AI-generated mockups are design references, not deployed pages, production assets or proof of working behavior. Written requirements in this report take precedence over incidental details in the mockups. Keep the existing black-and-gold identity and French customer-facing copy.

Implementation order

• 1. Clarify pricing, product actions and withdrawal consent.

• 2. Remove duplicate Marketing navigation; replace Categories with Packs.

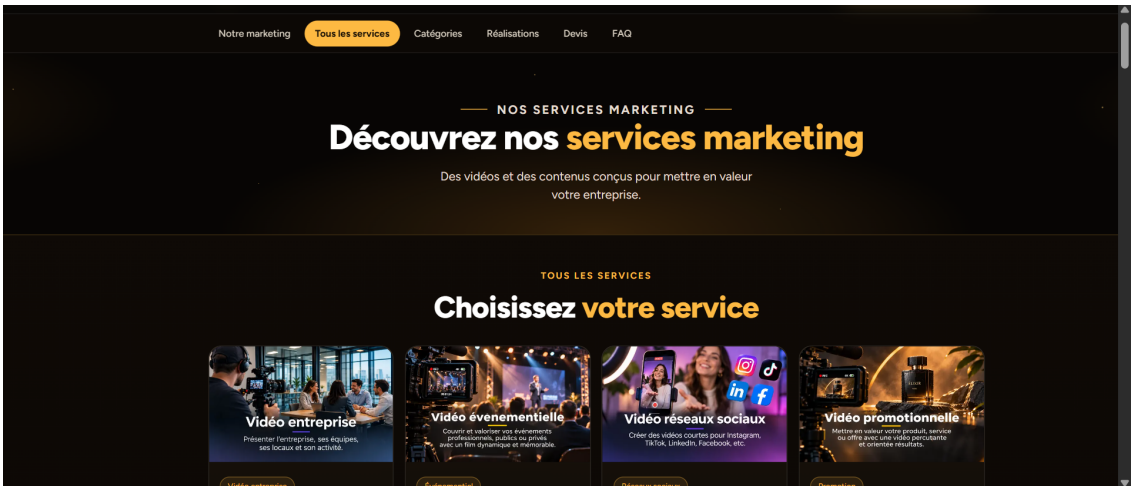

• 3. Correct responsive images, Digital card layouts and obstructing widgets.

• 4. Add project videos and complete offer content; run the final checks.

Business input still required

Final product and pack prices; HT/TTC treatment; pack contents; recurring-fee inclusions and commitment; project videos and publication rights; approved legal wording. Do not invent amounts, service guarantees or business commitments.

Remove duplication; introduce packs

Evidence: Marketing navigation and service listing.

M01 | P2 | Duplicate navigation - confirmed

The client reports that “Notre marketing” and “Tous les services” display the same content. Keep the direct product presentation and remove one of these two entries. Recommended retained label: “Tous les services”. Do not create an additional general presentation page to differentiate them.

M02 | P2 | Replace Categories with Packs - confirmed

Remove the “Catégories” navigation entry and its repeated service-group section. Replace them with “Nos packs”: actual bundles containing several services. The client accepted this approach. Category filters were discussed but are not part of the final agreed change.

Evidence: current Categories section repeats links to individual services.

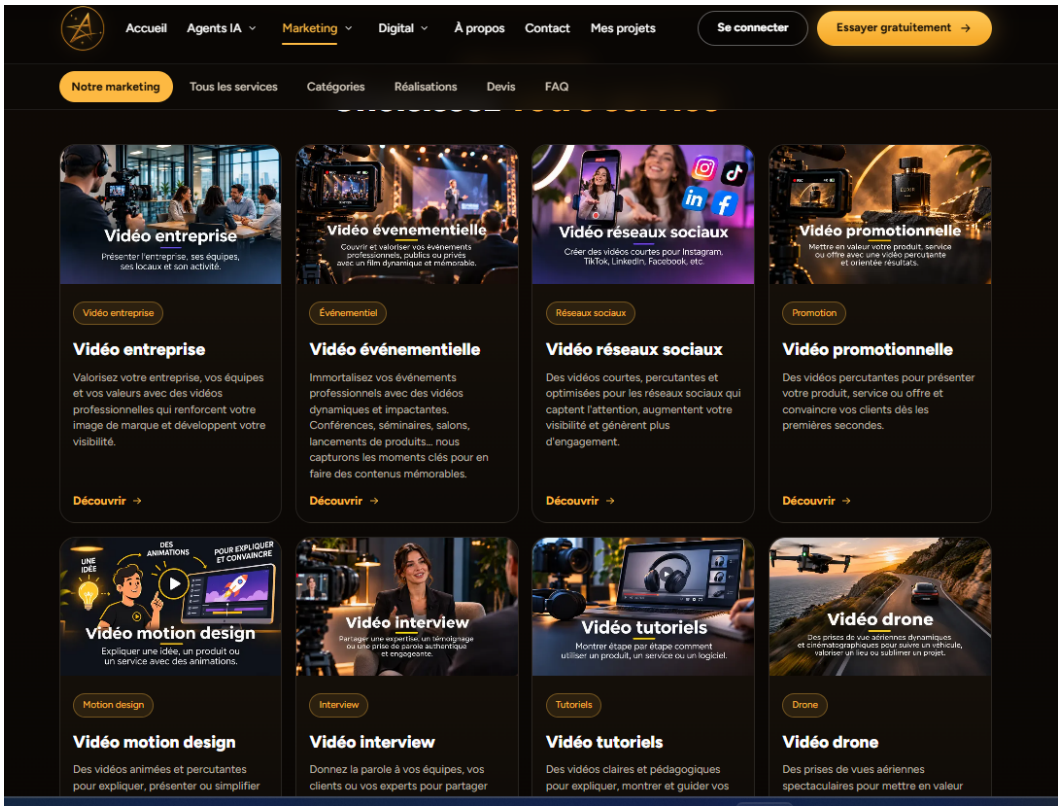

Acceptance criteria

• Only one navigation entry leads to the standalone product listing; removed links leave no broken anchors.

• “Nos packs” opens a distinct bundle section. Each pack explains included services, quantities/deliverables, starting price and an “Ajouter au panier” action.

• Pack contents and prices must be supplied by the client before publication; cart behavior must identify the selected bundle.

Show prices and purchase actions

Evidence: Marketing service cards show “Découvrir” but no visible prices or cart buttons.

M03 | P1 | Starting prices on service cards - confirmed

Display the approved starting price on every Marketing product card using “À partir de XX €”. Replace XX with a real approved amount; never ship placeholder text. Clearly indicate HT or TTC as appropriate to the offer and intended customer.

M04 | P1 | Add to cart - confirmed

Add an “Ajouter au panier” button to each purchasable service card. Keep “Découvrir” as a separate action for service details. If configuration is required, resolve mandatory options before adding a valid item; do not silently add an undefined variant.

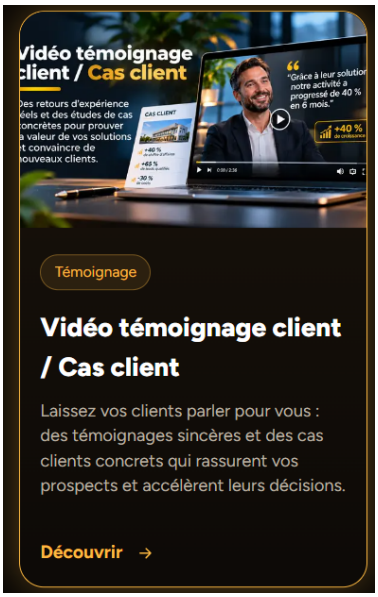

Acceptance criteria

• Prices and buttons are visible on desktop and mobile, with consistent placement across cards.

• “Découvrir” opens the correct service; “Ajouter au panier” adds the correct product and configuration, shows confirmation and updates the cart count.

• Repeated clicks, quantities and any mandatory configuration behave predictably; a starting price is not misrepresented as the final configured total.

Fix cropped card artwork

Evidence A: testimonial/case-study artwork is cropped at the sides.

Evidence B: property-video artwork has text against the left edge and a laptop cut off on the right.

M05 | P2 | Testimonial artwork - confirmed

Correct the framing of “Vidéo témoignage client / Cas client”. Keep meaningful image text and the important subject inside the visible card area.

M06 | P2 | Property-video artwork - confirmed

Apply the same correction to “Vidéo immobilier”. Avoid reproducing the crop with a newly generated image.

Implementation and acceptance

Inspect the actual image ratio, container dimensions, overflow and object positioning. Use a complete-image fit or a dedicated mobile composition when artwork contains embedded text. Reserve cover-style cropping for images that tolerate it. Prefer real HTML headings over text baked into artwork. Verify at 320, 375, 390, 768 and 1440 CSS pixels: no horizontal overflow, clipped copy or distorted image.

Testimonial image proposal

AI-generated replacement proposal for the testimonial/case-study artwork.

Use of this reference

This proposal was generated during the audit to demonstrate a more spacious composition. It is not an approved client testimonial, an actual client portrait or a real video player. Do not publish it as factual customer evidence.

• Use the composition as guidance or replace it with approved authentic material.

• Do not treat the depicted play button as a working control; implement accessible video controls in the actual site if video playback is intended.

• Even with new artwork, fix the image container and verify mobile framing. Replacing the file alone does not solve a CSS cropping problem.

Build a useful project showcase

M07 | P2 | Selected project videos - proposed direction

Populate the public project/realization showcase with a curated selection of videos from the videographers. Instagram links should complement the projects rather than being the only way to see the work. No project media was supplied during this audit.

Suggested initial content

• Start with 4 to 6 representative projects across the services being sold.

• Each project: intentional thumbnail, playable video, project title, service type, short client-need description, videographer credit and Instagram link.

• Obtain permission to publish the footage, client identity, people shown and any music or other protected material.

Acceptance criteria

• Visitors can review selected work on the website without needing an Instagram account.

• Videos do not autoplay with sound; controls work with keyboard and touch. Provide captions where appropriate and readable fallback content if a video cannot load.

• Use posters and deferred video loading so the gallery does not download every full video on initial page load.

Naming and location

Confirm whether this public showcase is the existing “Réalisations” section or another public “Nos projets” page. Do not repurpose “Mes projets” in the main navigation without checking whether it is a signed-in customer project area.

Assets to request from the client

Approved video files or hosting links; thumbnails; project names; short descriptions; client and creator credits; Instagram URLs; confirmation of publication rights. Do not fabricate portfolio entries.

Correct the withdrawal explanation

French-law context. Legal review of the final contract, service classification and purchase flow is required before release.

L01 | P1 | FAQ is too broad - confirmed correction

The current FAQ says fully performed services are excluded without explaining the required prior consent. It also categorically excludes professionals and refers to dated leisure services. These statements must not be applied indiscriminately to video-production contracts.

Rules the implementation must reflect

• For an eligible consumer service contract concluded at a distance, the ordinary 14-day period starts from contract conclusion, not video delivery. Delivery does not start a new 14-day period.

• To start during that period, collect the consumer’s express request. If the service is fully performed before the period ends, loss of withdrawal rights requires prior express agreement and acknowledgement of that consequence.

• Partial performance and withdrawal can result in a proportionate charge under the applicable legal conditions. Do not make a blanket “no refunds” rule.

• A video-production booking is not automatically a dated leisure activity. Some small professionals can have withdrawal protection for qualifying off-premises contracts; avoid a blanket B2B exclusion.

Checkout requirements

• Add an optional, initially unchecked early-start consent. Do not bundle it into a prechecked general acceptance box. If not selected, schedule performance after the applicable withdrawal period.

• Store the consent wording/version, timestamp and order reference, and include the agreement in the durable order confirmation. Provide the legally required withdrawal information and mechanism.

• Clarify when the contract is formed in the actual order/quote flow. If the offer is legally classified as digital content rather than a service, obtain advice on the distinct consent and confirmation rules.

French copy for implementation

Report instructions are in English; the website remains in French. Proposed wording must be validated against the actual CGV and contract flow.

FAQ: “Ai-je un droit de rétractation ?”

Si vous êtes un client particulier et commandez à distance, vous disposez en principe de 14 jours à compter de la conclusion du contrat pour vous rétracter.

Si vous souhaitez que la prestation commence avant la fin de ce délai, nous recueillons votre demande expresse. En cas de rétractation après le début du travail, le montant correspondant aux prestations déjà réalisées reste dû, dans les conditions prévues par la loi.

Si la prestation est entièrement exécutée avant la fin des 14 jours, vous perdez votre droit de rétractation à condition d’avoir préalablement accepté son démarrage anticipé et reconnu cette conséquence.

La livraison de la vidéo ne fait pas démarrer un nouveau délai de 14 jours. Vos droits en cas de prestation non conforme au contrat restent applicables.

Optional unchecked checkout consent

Je demande expressément que la prestation commence avant l’expiration du délai de rétractation de 14 jours. Je reconnais que je perdrai mon droit de rétractation lorsque la prestation aura été entièrement exécutée.

Acceptance criteria

• Consent is not selected by default, and placing an order remains possible without requesting early performance.

• The order confirmation preserves the actual choice. A delivery record alone is never treated as proof of prior consent.

• The FAQ, CGV, withdrawal process and checkout describe the same rules; other remedies for non-conforming work remain available.

Website offers: required changes

Evidence: website offers use icons; the chat welcome bubble obscures the landing-page card.

D01 | P2 | Add offer illustrations - confirmed

Replace or complement the small icons with coherent, meaningful visuals for Site vitrine, Site restaurant + commande, Site e-commerce and Landing page. Use consistent aspect ratios, safe framing and useful alt text.

D02 | P1 | Clarify pricing and actions - recommendation

Apply the established starting-price presentation to these cards: 2 900 €, 3 900 €, 6 900 € and 990 €, pending commercial approval. Add visible “Découvrir” and, for a purchasable configured offer, “Ajouter au panier”. No such action is visible in the supplied view.

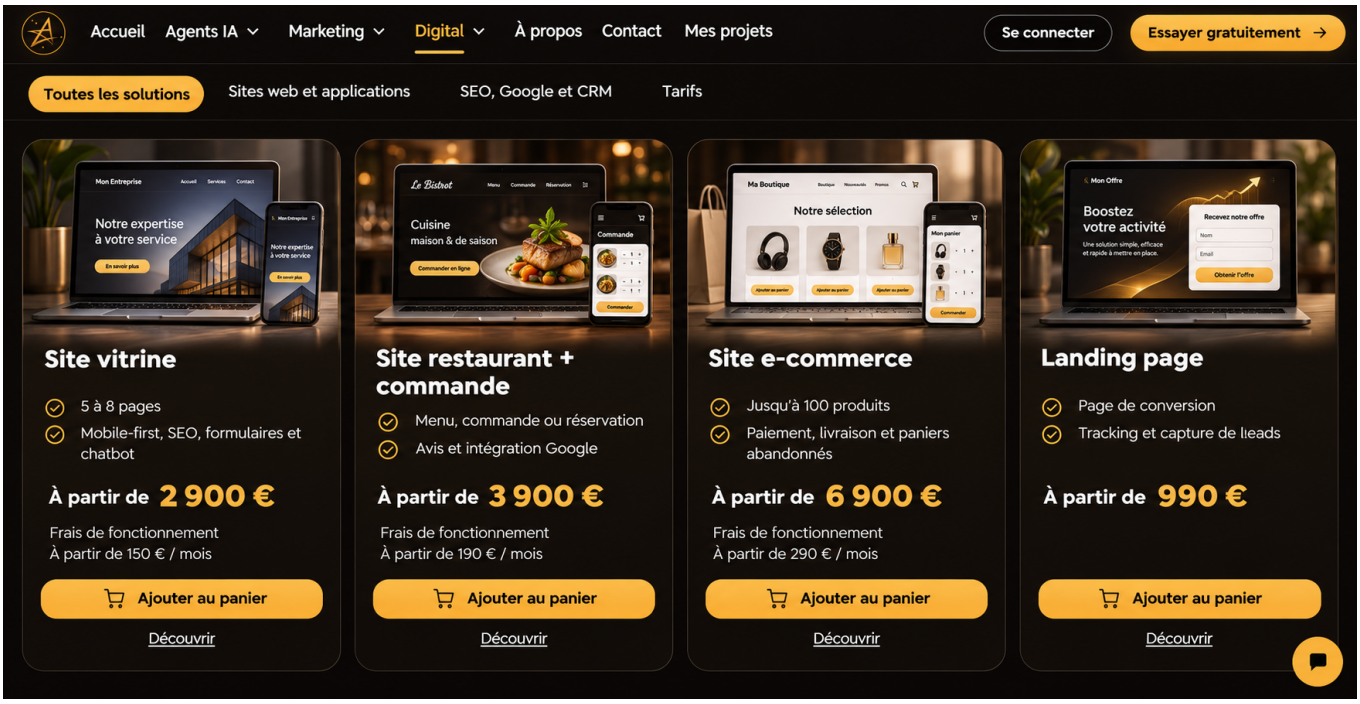

D03 | P1 | Explain recurring fees - recommendation

Current figures: from 150 €/month, 190 €/month and 290 €/month for the first three offers. Explain what is included, whether fees are mandatory, their billing start and any commitment. Clarify whether the landing page has recurring fees. State HT/TTC treatment; do not invent missing terms.

D04 | P2 | Alignment and widget overlap - observed

Align content areas and prices: the landing-page price is lower than the others. Prevent the chat message from covering offer content or actions. The cookie notice must remain usable without permanently obscuring controls; do not remove required consent handling merely to match a clean mockup.

Website offers: proposed layout

AI-generated design reference: illustrated offers, aligned prices and product actions.

Acceptance criteria

• Equal image ratios and card widths; aligned content, prices and action rows across the four offers.

• Offer titles, prices and controls remain legible on desktop and mobile. Grid becomes two columns or one column as space requires; no horizontal overflow.

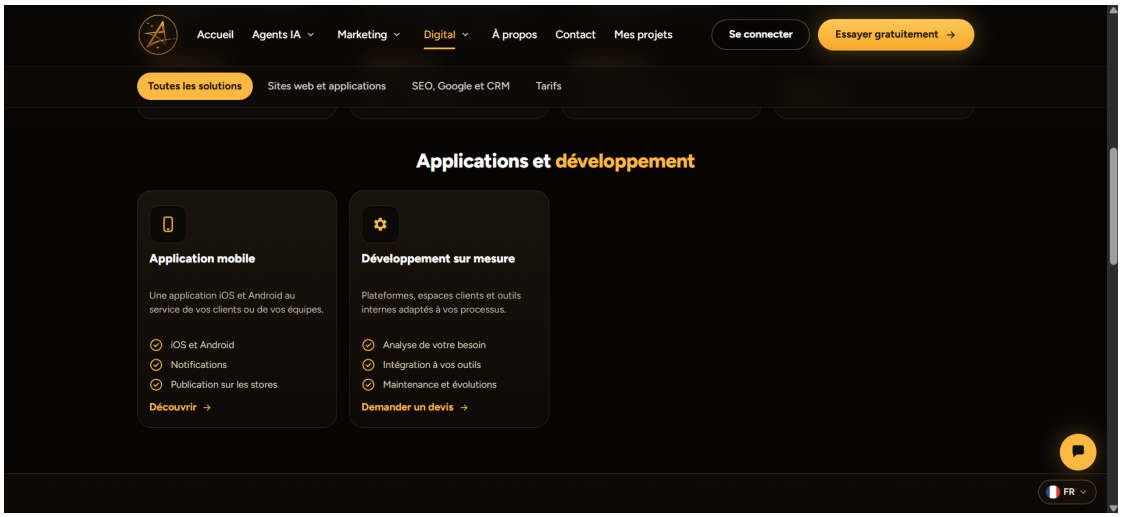

• Details and cart actions lead to the correct offer and validated configuration. Show all mandatory recurring costs before commitment.

• Chat, language and cookie interfaces remain accessible and do not obstruct critical content at narrow widths or 200% zoom.

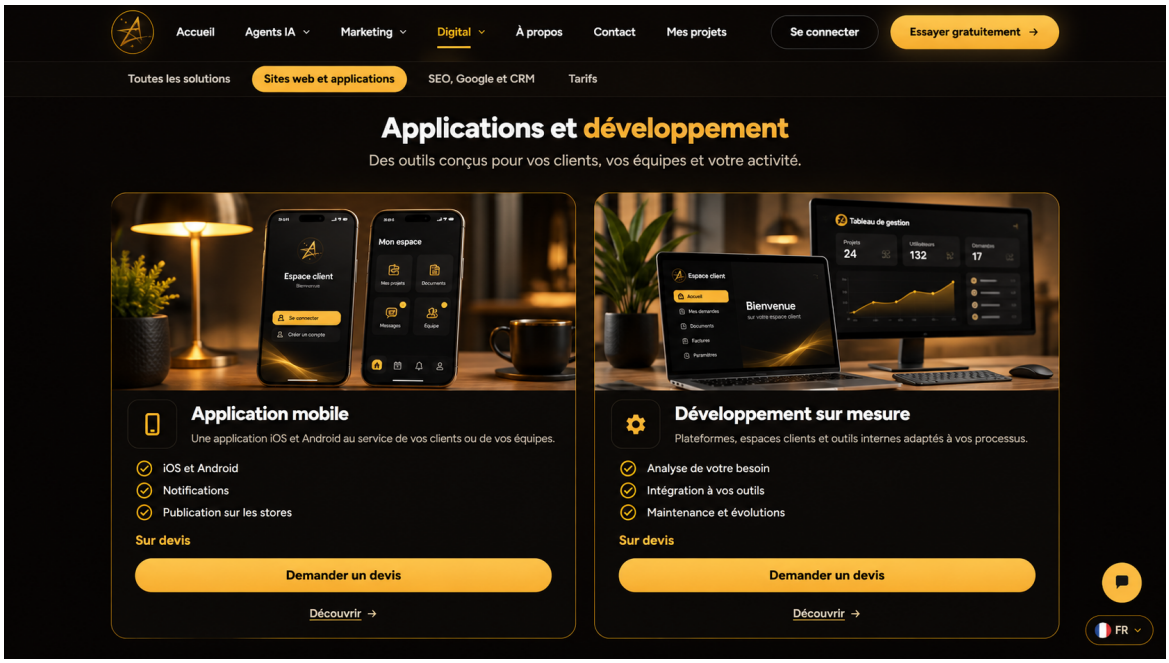

Interpretation of the mockup

The mockup preserves the supplied headline amounts; it does not approve their commercial accuracy or HT/TTC treatment. Absence of a monthly fee on the landing-page mockup does not establish that no fee applies. Confirm before publishing.

Center and illustrate both offers

Before: two narrow cards sit on the left beneath a centered heading, leaving a large unused area.

Proposed layout: wider, centered cards with relevant imagery and clear quote actions.

D05 | P2 | Application and custom-development cards - confirmed visual direction

Center the two equal-width cards under “Applications et développement”. Add matching visuals: mobile-app interface and custom platform/dashboard. Keep the existing service descriptions and listed features. Show “Sur devis”, a prominent “Demander un devis” button and a secondary “Découvrir” link.

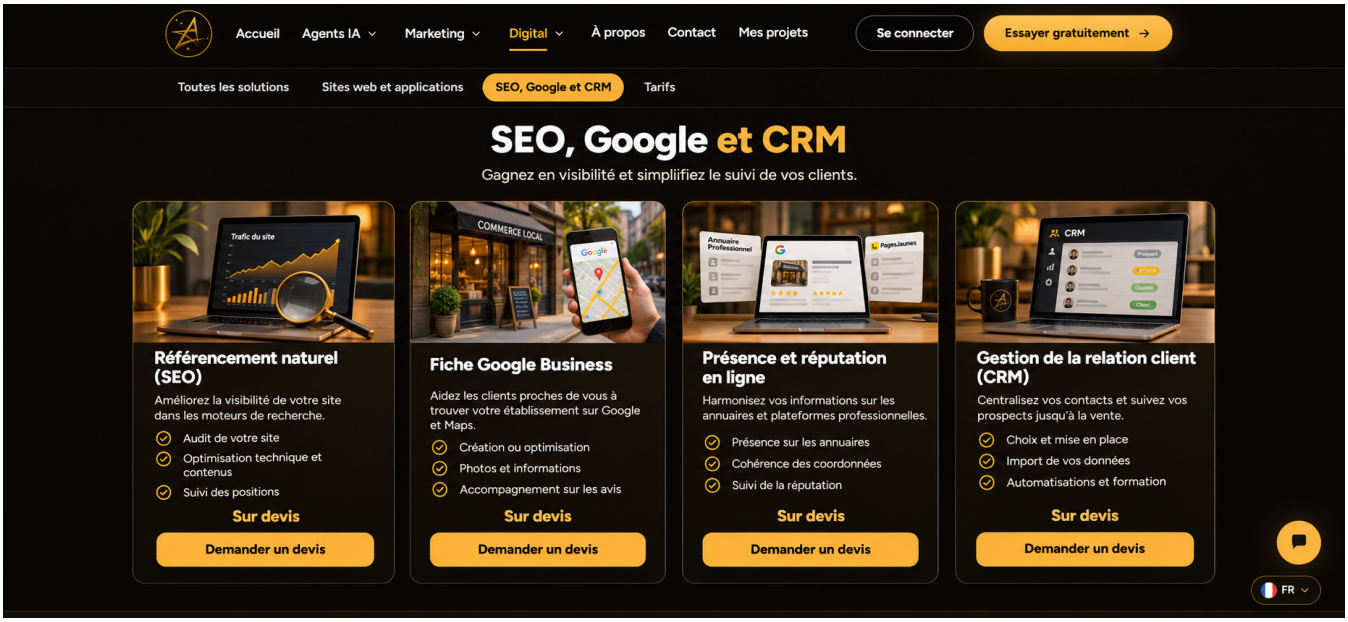

Acceptance criteria

Desktop outer margins are balanced; both cards share image ratio, content alignment and button placement. On mobile, stack cards in logical order. No invented starting prices. Quote requests identify the selected service. Sticky navigation must not hide the section heading when reached by an anchor.

Explain the offers and add visuals

Before: four consistently aligned cards, but only small icons and specialist terminology.

Proposed design reference: illustrative imagery, clearer offer names and visible quote actions.

D06 | P2 | Imagery and offer clarity - proposed corrections

Add relevant illustrations to all four cards. Explain SEO as “Référencement naturel” and CRM as “Gestion de la relation client”. Distinguish website search optimization, local Google presence, directory/reputation consistency and customer-contact management. Use “Sur devis” when there is no approved starting price.

Recommended card labels

“Référencement naturel (SEO)” / “Fiche Google Business” / “Présence et réputation en ligne” / “Gestion de la relation client (CRM)”. Keep “Demander un devis” for these quote-based offers; no cart button is required until a defined purchasable product exists.

Acceptance: preserve the already consistent card/button alignment, avoid unsupported ranking guarantees, and ensure each quote action carries the correct service. If section tracking is intended, update the active navigation state as the section changes; verify actual behavior first.

Release checklist & outstanding decisions

Functional verification

• Marketing duplicate entry removed; products remain directly accessible. “Nos packs” replaces the old Categories section without broken links.

• Every purchasable offer has approved pricing and a working product-specific cart action. Every quote-based offer submits the right service context.

• Project thumbnails, playback, credits and Instagram links work with the approved assets.

• Withdrawal information, optional early-start consent, saved proof and order confirmation are consistent with the validated contract.

Visual verification

• Review 320, 375, 390, 768, 1024 and 1440 CSS-pixel widths, plus a wide desktop view and 200% zoom.

• Check testimonial and property images first: important text and subjects stay visible. All new images keep their aspect ratio.

• Card rows, prices and buttons align; the application section is centered; widgets never block key text, prices or actions.

• Keyboard focus is visible; links and buttons have understandable names; images have appropriate alternative text; touch controls are usable.

Client decisions needed before release

Pricing: actual Marketing prices; HT/TTC presentation; recurring costs and terms.
Packs: bundle names, included items, quantities, limits and starting prices.
Content: authentic approved projects and final production imagery.
Legal: validated FAQ/CGV, contract formation event and consent process.
Navigation: confirm the retained Marketing label and the public location of the portfolio.

Definition of done

Provide desktop and mobile screenshots for each corrected section, demonstrate the cart and quote flows, and confirm the legal/content approvals. This report records requested changes and proposed checks; it does not certify that implementation or testing has already occurred.
